

Installation Guide for Hitch Mount Bike Carrier

⚠ [Safety Warning/Caution]

- Should not load more than four bicycles or exceed the designated carrying capacity (140 lbs)
- Please remove all accessories on the trunk/hitch before installation

[Preparation]

- Clean the trunk/hitch of your vehicle
- Wearing gloves to install is highly recommended

Step 1:

- Attach the vertical tube to the main tube.
- Insert the securing bolt through the main frame and secure with washers and hand nuts.

Step 2:

- Attach left and right support tubes on the main support tube.
- Insert the securing bolt through the main frame and tighten them.

Step 3:

- Connect the trailer hitch to the receiver of your vehicle.
- Insert the secure bolt. **(Not Included)**

Step 4:

- Now you can load your bike.
- Use the cradle straps to bind the bike.

Final

- Ensure that the bicycles did not come in contact with the vehicles bodywork.
- It is recommended to do a test-drive to make sure the bike carrier securely held in place.
