

Installation Guide for Crossbars

⚠ [Safety Warning/Caution]

- Please remove the antenna or any accessories on the roof before installation
- Wearing gloves to install is highly recommended
- Do not load or exceed the designated carrying capacity (150lbs/ 68kg)
- Do not over-tighten the knobs or bolts

Step 1:

- Slide the clamps on each end of the cross rail.
- Insert the bar end caps.

Step 2:

- Put the crossbar onto the roof of your vehicle.
- Insert the lock into the clamp as shown, and turn it clockwise to make the clamp tighten.
- Use the lock to tight the other end of the clamp, and use the key to lock the clamp.

Final

- Repeat above steps to the other clamp.
- Check that the crossbars stay firmly.
