

Installation Guide for Roof Rack

Preparation:

- Clean the roof of your vehicle (recommended)
- Please remove any accessories on the roof
- Wearing gloves to install is highly recommended

⚠ [Safety Warning/Caution]

- Do not load or exceed the designated carrying capacity (150lbs/68kg)
- Do not over-tighten the knobs

Step 1:

- Slide the two square-head bolts through the bar, place the tower feet underneath the rail.
- Tighten to screw each bolt with a tri-wing nut, attach the rubber tower cover at the bottom.

Step 2:

- Adjust the length and cut the rubber insert so it fits properly into the rail.
- Install the bar end caps on both sides, firmly press the cap to make sure they are locked in place.

Step 3:

- Place the rack onto your vehicle and adjust its position, and tighten the two tri-wing nut.
- Choose the corrected one from 3 different size of mounting brackets for your vehicle.

Step 4:

- Lift up the rail and press out the silver bolt, attach the mounting bracket between the window trim and the tower feet.

Step 5:

- Push up the mounting bracket while tightening the knob, and make sure the roof rack is tighten in place
- Attach the mounting bracket between the window trim and the tower feet. Turn clockwise to screw on the black lockable knob.
