

# Installation Guide for J-Hook type Wiper (s)

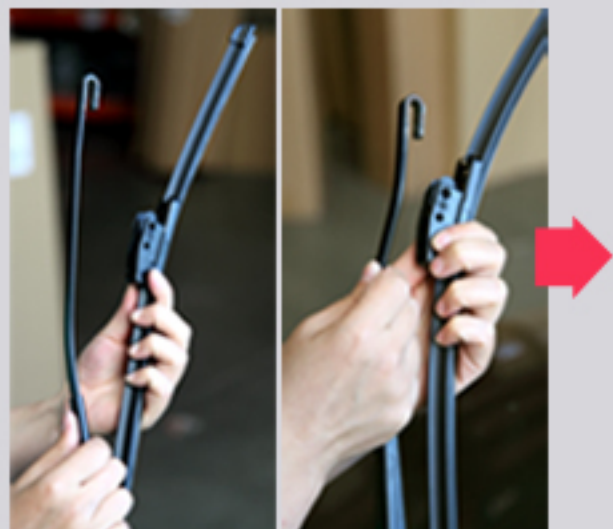

- J-Hook type Wiper Blades

Make sure your wiper is for a J-Hook type and the length of the wiper is correct for your windshield (For more accuracy, please check back the vehicle manual user book for correct wiper sizes)

- Cleaning cloth & cleaning liquid (recommended)
- Wearing Gloves to install (highly recommended)

**Step 1:**  
Remove the old wiper blade and clean the J-hook with cleaning material. Lift up the wiper arm.

**Step 2:**  
Slide the new wiper blade over the J-hook as shown the pictures before.

**Step 3:**  
Snap it in and pull up hear a "Click".

**Step 4:**  
Put the wiper arm down. Installation should be done. It is suggested to test the wiper blades after installation to guarantee security.

**⚠ [Safety Warning/Caution]**  
If the product has any damages when opened or it is not the right size for you wiper, please contact us as soon as possible.
